Dec. 26, 2012

Titan Block,

I have worked as a mechanical Engineer, specializing in hydraulic powered machines; I also have an M. S. degree in computer science. I have more than 15 years of business management and 10 years of marketing, new business development experience, several stone processing manufactories and stone trading companies, supplying building materials for local and oversea markets in last 20 years; 10 years of experience for commercial and residential property marketing and development.

My opinion about the waterproof brick is that it is the green building material of the future that is ready for the market today. Homes will be safer in storms, fire resistant inside and out, mold and mildew free and save energy without increasing the price of the home.

Sincerely,

A handwritten signature in cursive script that reads "Joe Zhang".

Joe Zhang

President of J & J Stone Imports.
